Dear Friends and Colleagues,

We are delighted to invite you to the 2018 NAMIC Global Additive Manufacturing Summit, organised in conjunction with Industrial Transformation Asia Pacific – A Hannover Messe event. Held on **17-18 October 2018 at the Singapore Expo**, register now or by 14 September to enjoy early bird rates with discounts!

5 Top Reasons To Attend

1. The biggest NAMIC summit ever

The largest edition of NAMIC's hallmark additive manufacturing summit series - a two-day event encompassing the latest and most exciting developments in multiple industry tracks such as aerospace, healthcare, precision engineering, construction, food, fashion, consumer and lifestyle products.

2. Partnered with Hannover Messe

The [NAMIC Global Additive Manufacturing Summit](#) is held in conjunction with the first-ever Asian edition of the world's leading industry technology fair - [Industrial Transformation Asia Pacific](#). The industry 4.0 trade show is specially curated for the Asian region; focusing on adoption, application stories, addressing market readiness and opportunities for APAC businesses.

3. Get AM Certified

The [Fundamentals of Additive Manufacturing workshop](#) covers topics that will shape your understanding of the applications of 3D printing to suit your business needs. Created in conjunction with UL Additive Manufacturing, it targets industry practitioners keen on certifiable, stackable knowledge in AM that may lead to future mastery in AM principles and processes.

4. An eco-system of over 250 AM practitioners at your fingertips

Keep abreast of the latest developments in the global AM and Industry 4.0 community. Assess your current state of future-readiness in relation to others in the industry. Be inspired by the possibilities of technology and forge connections that might lead to the most exciting collaborations and synergies of your career.

5. The most promising case studies in Additive Manufacturing

A showcase of the latest companies delving into AM to inspire and stir the imagination, with a strong bias towards locally-based start-ups. Who's up-and-coming right now? Whose ideas are truly ingenious? How have others made it feasible to adopt AM? What direction is the industry heading towards? See their work for yourselves and speak with the people who made it all happen.
