### **3D CAD Modelling/Product Design**

Our objective at Chemtron is to help our clients with new product design and CAD services, from 3D CAD design services to rapid prototyping along with design for manufacturing. We offer a full production turnkey solution. We are equipped with designers and rapid manufacturing specialists along with the whole suite of top tier industrial 3D printers to bring our customers ideas to life.

### **3D Printing Services**

3D Printing Services Chemtron offers professional 3D Printing in Singapore. We are able to produce high quality parts in multiple materials and finishes with short lead times. Let us assist you with your 3D Printing requirements and we can turn the most complex ideas into physical item in days.

### **3D Scanning Services**

3D scanning is the process of converting physical objects into precise digital models. It enables you to quickly and accurately capture your object's shape and geometries, and supply you with a complete digital representation of your part to be used for reverse engineering or quality inspection.

### **Rent a 3D Printer**

Chemtron wants to empower companies like yourself to take up 3D Printing. We have started this initiative to enable customers to get hands on experience before they choose to commit to a particular printer. You can even rent 3D printers for a particular project or events for without having to invest in a capital equipment!
