AM MATTERS

December 2021

Supported by

NATIONAL
RESEARCH
FOUNDATION
PRIME MINISTER'S OFFICE
SINGAPORE

Dear Colleagues and Friends,

On behalf of our cluster teams, I want to express my heartfelt gratitude to all of you for walking this journey with us over the past 6 years. Without your unstinting support and partnership, we would not have made it this far.

2021 has proven to be no less VUCA than 2020. I feel we can be thankful for what we have despite the evolving challenges. There is so much to be positive about. A better future is within our grasp if we work together hand-in-hand. All of us can make a difference and impact.

Merry Christmas and wishing all of you a blessed new year in 2022! Rest and recharge. Enjoy the festive break.

Happy holidays!

PROJECT HIGHLIGHTS

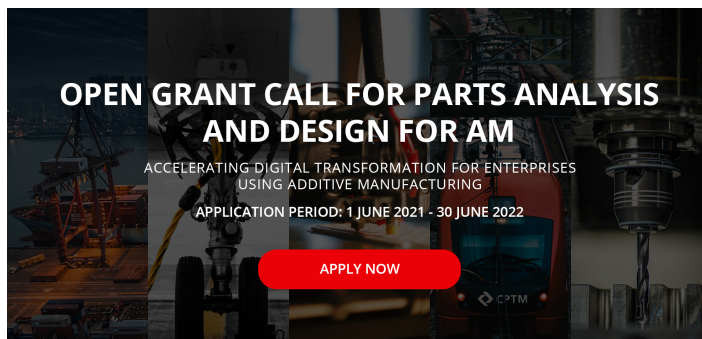

A 3D printed cube is among Singapore's contributions to an art gallery heading to the moon. The cube is a collaboration between **Singaporean artist Lakshmi Mohanbabu** and **Assistant Professor Matteo Seita** from **Nanyang Technological University**. Click [here](#) to read the full article / [here](#) to watch video coverage.

3D printing has helped to create a lighter and more robust knee brace for elderly patients. The knee brace was developed in a collaboration between a local engineering firm, **Delsson Singapore**, **knee surgeons** and **3D printing specialists** from **NTU**. ENDING AN EVENTFUL YEAR 2021 WITH NAMIC

Launched in June 2021, the ongoing program has curated more than 20 projects spanning across robotics, healthcare and M&O industries among others. The program helps companies in AM part selection, design, fabrication and testing.

Mori Asia, Thales, Siemens, HP, Additive Flight Solutions, Osteopore, Mistletoe, Xora Innovation, Aztech Technologies among others and centered around how we can work together to nurture and grow more deep tech startups towards unicorn status.

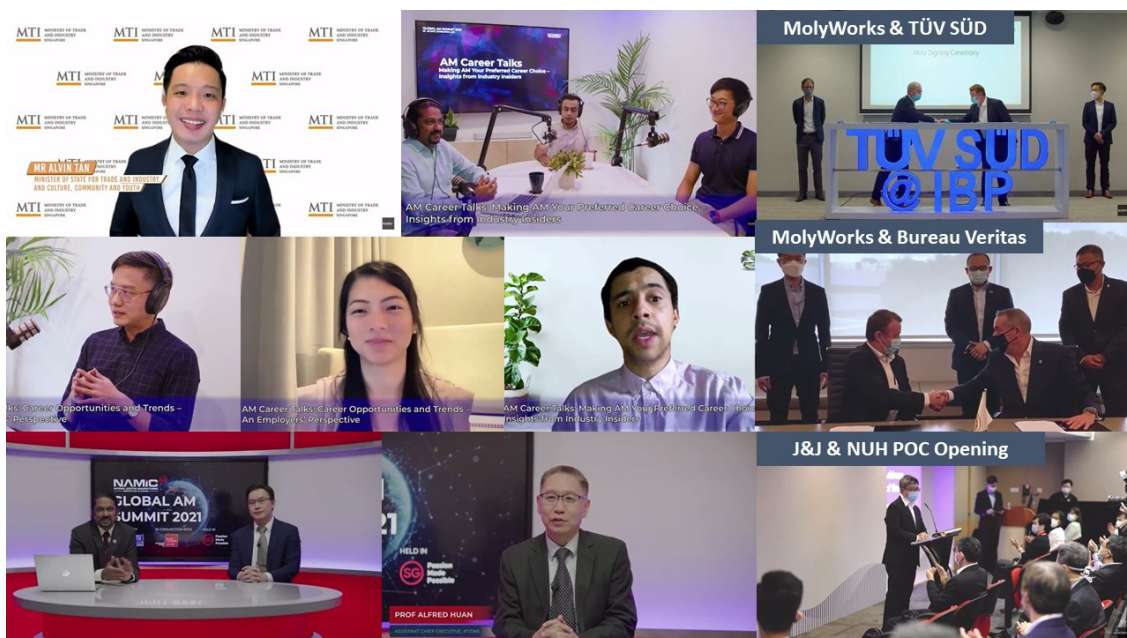

Global AM Summit 2021

The summit witnessed inspiring speeches from our guest-of-honour and keynote speaker, as well as three key milestone MOU signings that promote sustainability in the AM space and advancements in AM adoption in the healthcare sector. 2 newly introduced segments allowed delegates to hear from leading AM corporates, employers and talents on business and employment opportunities.

GAMS 2021 was met with great success, with over 600 delegates and more than 20 global experts who spearheaded thought-provoking discussions across various AM spaces such as aerospace, healthcare, food and sustainability. The flagship AM Summit series is one of NAMIC's key initiatives, bringing the latest global AM developments and industry applications to our audience. Stay tuned for **GAMS 2022** next year as we hope to be back with a physical-hybrid program!
