GLOBAL AM SUMMIT 2025

UNLOCKING AGILITY AND SCALE WITH
DIGITALISATION AND ADDITIVE MANUFACTURING

16 & 17 OCTOBER 2025
MAX ATRIA SINGAPORE EXPO

10 Years
with
NAMIC

Join us for Singapore's leading summit on additive manufacturing

The two-day summit will dive into how additive manufacturing and digital technologies are transforming industries, enabling scalable production, and driving circular economy manufacturing.

PROGRAMME

Additive Manufacturing: A Global Outlook

16 Oct | Track 1

Can Additive Manufacturing Rebuild Resilience in a Disrupted Global Trade Landscape?

As global manufacturing grapples with escalating trade tensions and the resurgence of protectionist policies, the additive manufacturing industry faces both unprecedented challenges and transformative opportunities. Recent tariff hikes have disrupted supply chains and increased production costs, prompting companies to re-evaluate their sourcing strategies and explore localised manufacturing solutions.

In this complex landscape, the session will convene experts from various regions to share insights into how their local ecosystems are navigating these dynamics. Discussions will encompass regional advancements, policy responses, and the strategic integration of additive manufacturing to enhance resilience and competitiveness in the face of global economic shifts.

Dr Terry Wohlers
Distinguished Fellow
of Advanced
Manufacturing
Wohlers Associates,
powered by ASTM
International

Matthias Schmidt-Lehr
Managing Partner
AM Power

Dr Ehsan Toyserkani
Canada Research Chair
in Intelligent AM
University of Waterloo

Kitty Wang
Founder
3D Science Valley

Arno Held
Managing Partner
AM Ventures

Joris Peels
Vice President Consulting
AM Research

"GAMS has been fantastic to be able to participate in. It is a true industry ecosystem. I have learned so much from a range of partners who exist all throughout the value chain. And more importantly, those who can help connect me into future opportunities."

Karina Cady, Chief Executive Officer, Nandina REM

"The biggest benefit we get from participating in GAMS is the face-to-face interactions with leading companies in additive manufacturing. To be able to ask them questions and understand their experiences and learn what challenges people are facing."

Michael Robinson, Chief Technology Officer, Hyperganic
